

omas.sustainability

Our company pays close attention to the environmental issue, and it is precisely the continuous improvement that allows us to offer high quality standards

Factory

omas.sustainability

Latest generation air conditioning systems with temperature control

Photovoltaic system, covering company's needs and consumption

Led lighting system and power factor correction devices

Staff awareness and environmental guidelines for waste disposal sorting

Processing

Recyclability of supplier packaging
reduction of the consumption of
wood, paper and cardboard

Reduction in freight transport
consumption, thanks to the use
of 0 km suppliers

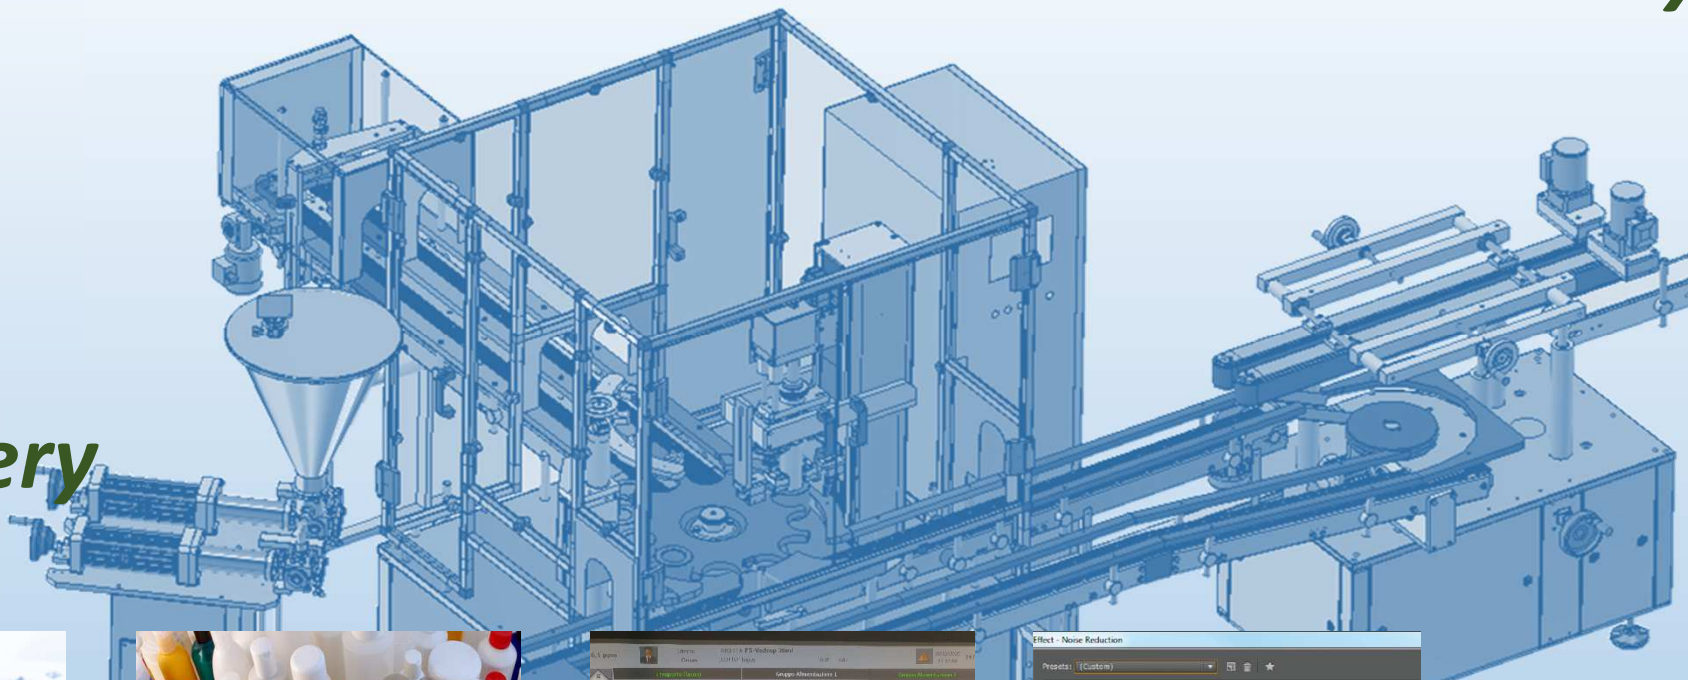

Recyclability materials of
production waste

4.0 Industry ready for the
achievement of the Smart Factory

Machinery

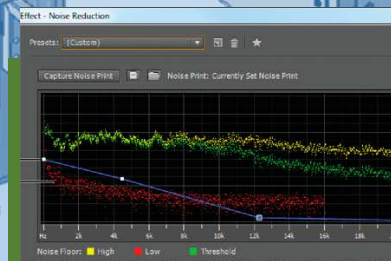

Machines designed and engineered for compact lay-outs

Packaging and bulk optimization and saving during factory acceptance tests

Energy saving, thanks to "Safe-Power", automatic machine stop

Environmental noise reducing, for low impact and human protections

Maintenance and Assistance

omas.sustainability

Fat in streaming, reduce travel
and CO2 consumption

Reduction of CO2 consumption
trips, thanks to remote assistance

Remote management for
monitoring and maintenance
machinery

Intervento Di Manutenzione Ordinaria			
Id	Descrizione	Stato	Check
1	Ispezione visiva dell'intero sistema	20000	20000
2	Verifica dei livelli dell'olio motore	20000	20000
3	Verifica dei livelli dell'olio idraulico	20000	20000
4	Verifica dei livelli dell'olio idraulico	20000	20000
5	Verifica dei livelli dell'olio idraulico	20000	20000
6	Verifica dei livelli dell'olio idraulico	20000	20000
7	Verifica dei livelli dell'olio idraulico	20000	20000
8	Verifica dei livelli dell'olio idraulico	20000	20000
9	Verifica dei livelli dell'olio idraulico	20000	20000
10	Verifica dei livelli dell'olio idraulico	20000	20000
Intervento Di Manutenzione Programmata			
Id	Descrizione	Stato	Check
11	Verifica dei livelli dell'olio motore	20000	20000
